September 2018

Dear Parent/Guardian(s):

This letter is to inform you that we have a student in our school that is immunodeficient. This means that because of their health they are extremely susceptible to contracting illnesses from others. It is important that the family be made aware if she has come into contact with **any contagious illnesses, and in particular chicken pox.**

If your own child is unwell, please consider keeping them home from school. We would also ask that if **your child contracts chicken pox or any other contagious illness during the school year, that you contact the school office immediately as it can be fatal for this child.**

Please keep in mind that every child has a right to be at school, and for the school to be a safe environment for them.

Thank you for your cooperation.

Sincerely

Heather Smith
Principal

Simcoe County District School Board
